12 Ways to Protect Your Business From A Cyberattack!

Security Awareness
An engaging 3-4 minute Hollywood style training video educates and reinforces good cyber hygiene and empowers uses to become defenders of cyberthreats.

Email Security
Prevent threats from ever reaching your inbox. Our comprehensive email security solution provides proactive data loss protection by combining advanced tools and experienced analysts.

Managed Endpoint Detection & Response
This solution monitors endpoints, detects suspicious behavior, blocks malicious activity, suggests remediation steps and, most importantly, is managed by security experts.

Managed XDR
Managed "everything" Detection and Response is a unified approach to detection and response that collects and correlates all security tools to protect the entire enterprise attack surface effectively and efficiently.

Secure Access Service Edge
The solution tackles the emerging security challenge for your cloud-enabled business by moving enforcement to the edge where your team, devices, apps and workloads interact.

Vulnerability Management
Combines people power with data mining and machine learning technology to uncover, prioritize and block the holes in your defense continuously — 24/7/365.

? DID YOU KNOW
- 99% Overwatch SOAR™ Alert Reduction
- 100% U.S. based Overwatch SOC/NOC is 24/7
- 81% breaches happen to small & medium businesses

Patch Management
This cloud-native solution remediates patch vulnerabilities, deploys required software and fixes misconfigured systems.

Managed Secure Edge
Whether you have one office, branch offices, remote or mobile workers, this solution provides network security and redundancy to your hybrid work environment.

OT/IoT Security
With one click, we can lock down your network, isolating the threat so it can't move between devices or locations.

SaaS Monitoring
SaaS Monitoring neutralize threats before they can cause significant damage, mitigating downtime and data loss by leveraging best-in-class tools and expert oversight.

Network Detection and Response
Tap into our cybersecurity war room – a CISO-led 24/7 SOC staffed by security analysts leveraging enterprise-class threat detection and hunting tools.

Cyber Warranty
Overwatch Cyber Warranty helps reimburse costs associated with remediating successful cyberattacks with plans that fit every budget.
